THE STRATOFIGHTER™ STILETTO

TACTICAL FIGHTING FOLDER

US RETAIL: $269.00

A full size fighting folder built to the durability requirements of full-on, Spec-Ops combat! If you need a utility folder, this is not the knife for you. The StratoFighters feature Dark Op's proprietary RaptorLok™ , a self cleansing double talon locking system that uses the entire length of the knife to support the opened blade. Unlike modern unproven and complicated locking systems, the basic principles of this design have been tested for over fifty years. Dark Ops' secondary CrisisCross™ cross-bolt locking system serves the dual function of preventing the knife from being closed while open and prevents the untrained user from deploying the knife if separated from its owner. The pommel end of the knife offers an integrated emergency window breaker and paracord safety tethering hole. The scales are made of T6160 aircraft grade hardened aluminum, not porous materials that cannot be decontaminated from bodily fluids or chemical munitions. Carved into the sides of the scales are lateral control grooves that provide indexing points in darkness as well as additional control without increasing the width of the handle. Deep finger grooves orient the knife in the hand and add a third more grip area. Quartz impregnated inserts provide extreme circumstances grip enhancement and are replaceable should decontamination be required. The Pocket clip is reversible for true ambidextrous tip up carry. Choice of military Hard Anodized (IR Invisible) finish or Carbon Black Titanium CarboNitride (TiCN) vacuum deposited finish, designed to shed the micro-fine airborne sand of Middle-eastern deserts. The Blade steel is made from Dark Ops proprietary CTV2 steel, an exotic and expensive Hybrid of Chromium, Cobalt, Tungsten, Vanadium, Molybdenum, in an alloy of surgical grade stainless steel. Thorough hardened to 58 HRC Rockwell with a secondary cryogenic cutting edge hardening, it is a steel that is basically indestructible! A full quarter inch thick, it is one of the heaviest production blades in existence today. Production versions feature the StratoFighter Laser Engraving and CTV2 Steel demarcation. 100% made in America! Spear point blade styles available with half serrated cutting edges.

SPECIFICATIONS

Total Length: 10.20 in.
Blade Length: 4.50 in.
Weight: 8.61 oz.
Blade Thickness: .25 nom
Blade Steel: CTV2 Stainless Steel
Handle: T6160 Aircraft Aluminum
CrisisCross™ Cross Bolt Safety
RaptorLok™ Back Lock
Heavy Duty Pocket Clip. Reversible for true ambidextrous use.
Emergency window breaking stud in pommel end

SKU: SFS-1

MODIFIED CLIP, CARBON BLACK TITANIUM CARBONITRIDE (TICN) FINISH

SKU: SFS-2

MODIFIED CLIP, TYPE 3 HARD ANODIZED (IR INVISIBLE) FINISH
